 Haght ICA
 [Redacted] } CIA

25X1A9a

R. [Redacted] (Comm.) We have been working directly with ODM + have developed directives on export and commodity controls. What is we are going to do?

Hale: Adm D. thought his assignment from ODM to ICA was one which FRAC should get in order to initiating action steps in ex. dept. + be sure word was given if needed. But need more mostly to initiating actions + if E. any agencies needed to coordinate it would be done. Then FRAC would report to ODM that this was a collation of steps agreed on inter-agency.

SECRET

Comm
R ~~to~~ Can't give you whole Commerce
action inventory; ~~there~~ is data live
only found two

Take We aren't interested in US
unilateral actions, but to
extent that Comm inventory
includes new - 20 day
subjects, ~~that~~ more not
asking WG III to coordinate.

Zuckerman Let's look at 12/15 memo
to D/L from M. man listing
action steps - We are
concerned with 1st 30 days.

Morgan: What ODM wants from State
is as follows: I'm not yet
clear how this ties to WG III.

SECRET

ODM has heads of all defense agencies.
Wicks
McKay
Wang Kaljanovic
etc. } Def. Mob. Bd
DMB

This group has set up 4 different
Plans B, C, D, D Minus.

~~SECRET~~

D Minus is worst situation +
crosses US action in next
all out atom attack in Conten.
USA now with no warning.

Dog : differs only in a ~~lot~~
more warning time + a
govt. war org. set up in
advance of attack + some
war agencies in being.

Charlie : gen'l mobilization
without attack on CLVSA

Baker Lighter : maybe
removal on border attacks
in Korea etc.

1st emphasis on D Minus because
hardest. June 56 will test
this plan as did June 55
alert.

Morgan is from Materials
area ODM. Others include
Manpower, Stabilization, etc.
The problems in Materials
are clearest + : this is.

D Minus Plan is approved by
DMB + assumed Pres. has
full legal authority now +
lack of standby legislation
not considered important at
int. Infinite authority +
funds assumed available.

∴ D Minus does not
assume any legislation
needed.

Re Materials affects this plan,
various agencies need to
advise soon.

OST report on stockpiles
Agencies " " Types damage.
e.g. copper mines; Interior
reports.

∴ we'd issue general
regulation promising to
buy all strat. materials
for 3 mos. Purpose: assure
continuity of production.

Re foreign procurement in
West Hemisphere, some Regulation

The State, it was assumed
in D Minus that State, including
~~100~~, would handle all foreign
problems. But this affects
foreign materials availability.
We need arrangements with all
Allied supply authorities to
maintain pipelines, for clearing
log. load out, ^{store} ~~store~~
stocks, make any commitments
possible quite aside from
specific authority

Went: We don't want to tie too
closely to NATO in detailed
plans because the assumption
of kind of war is greater.

Morgan: We have to come to State to
say: "Tell us what you're
doing + are doing + what
instructions."

Zuckerman: How long is war
projected in D Minus?

Morgan: Our stockpile assumes

now assumed in D Minus

situation with 20-30 major cities
blown up.

To survive we'll need all
of everything we can get anyhow.
Instructions should tell
all our people ahead to
preempt anything available
in, this is not worked out
~~right~~ with our Transport people
yet, because under
D minus it would take a
while to communicate etc.

in D minus people on
spot must take own
initiative ~~+~~ not
straighten it all out later.

If shipping people can
issue overriding orders. They
might take precedence. I'm
only speaking re Materials
procurement.

Myron: These plans have been held
as SECRET that plans aren't
available for general dissemination

Winn: OMO monetary. Before

SECRET

should check with ODM.

Haght: What intra-State coordination now? I don't know any intra-State mechanism for int. assignment.

Tuchman: Don't know.

Morgan: Our assignment from ODM is to Mueller, after FOA filled.

Haght But State's order said to continue dealing with ICA or discontinue.

Hall Have to see order to interpret

Morgan In Materials field ICA never had important functions in important producing countries.

At highest level, wartime organ. has given Sec St. respon. for all these ^{foreign} activities. Maybe this confusion but ODM has to deal with State + Secy State has to clarify.

Hall : DeL. T/R are memo to ICA
from ODM telling him to
do ~~some~~ ...

" I think DeLong should
re-examine his request on
WB III + see whether he
should work thru
Hollister + State.

I think that ICA
is relieved from its st assignment
from ODM by the later facts
given by Morgan as Buller
being coordinator.

Morgan agrees that many
unclear issues.

Myrt : Maybe Nelson + Savage (State)
have this worked out + we
just don't know this

Gus : y State were to seek ~~the~~
WB III consideration, this
matter should go further. I think
State would.

Morgan
~~State~~ : Shipping, Production, Communi-
cations are going to be

are so jumbled up re intra-US
situation that Malinval,
which has extra-US problems,
is probably ahead of them.

Doyle How would state coordinate
an instr'n re many of
these subjects

Doyle DMB is place for
final coordination.

Ques: In preparing instrns. under
the assumptions given given
should with state other
assumptions?

Moyn A full set written
instructions exists for DMB use.
Savage (St.) is the lead
for gas to procure. These
assumptions do not help you
much in this planning.

The foreign side of this
whole picture has been
weak. We have been

unwilling to talk to
availability for + life sources to

its hard to do more than
~~we~~ give black check

Pike is OSD Rep. DAIB
 Gen Paul (Ret) ODM stop
 in ODM Plans is added
 by Brig Genil Hugland (ex. USAF);
 they don't sit on DAIB
 but rather has direct tie to
 JCS.

Gus: State wouldn't be looked
 to to ask WC III to
 consider matters on Det-
 list solely in COMIN
 jurisdiction?

Morgan Yes, ~~under~~ ^{but} COMIN
 might decide coordinates.
 And Interior has to control
 metals supply - they'd have
 to come to H. re Chilean
 copper, for ex.

Morgan Can ODM have states ^{outline} response
by 15 Jan. ? Just brief outline ?

Gus Will try.

Morgan ODM Will test Plan C in April.
(Not leaving Wash.)

(Morgan leave)

Winant:

Is St. sending out letters to
field now? Or just developing
samples?

Gus Don't know; only know people
who have handled in concrete
matters. ~~Some~~ have
given it to Savage. Don't
know what has happened
beyond this.

Hayes:

Winant Gus ODM looks to St. to
do major coordinating job re
foreign aspects.

Conclusion

Hale/Haght + Gus will
investigate with seniors. Then
will check w. Comm on its relation.

Pending Pres. the F.W. item
withdrawn from active agenda
WB III.

#

Item II Agenda (Penetration)

Jus. Calls for comments:

Hayes: EDAC has the competent people

Smith:

25X1A9a

"CIA accepts paper basically re lack confidence with" [Personal opinion that paper needs give more guidance to EC by deeper analysis.]

Would regret more committees proliferating. Maybe Dodge Committee competent.

Cham

We think we need an indep. group to deal with problem. We prefer OCB to Dodge Council. Doubt problem explained enough at this level to be moved up yet.

Van Sant

Has no agency position. Generally agree with paper.

-19-1/4/66

MOAC disappointed that paper didn't take positive view of alternatives for EVAC.

MOAC hasn't been able to revise due other commitments, but Jpr present record draft at next meeting setting forth area where EVAC could function + where it couldn't.

Adm D. would like EVAC agree on paper EVAC T/R + pass it to other higher groups as EVAC Jpr.

We're also willing to comment present paper more to EC.

Our draft would try to show area where EVAC couldn't handle; don't know what we'd want to say about what a higher level group should do, if existing.

No NSC order directly on this subject; would refer to it peripherally.

SECRET

Holl: The study very more
 SSB makes should come
 to WG III + its Panel
 + hence to WG IV for
 analysis of impact on
 ec. dev program + other
 programs which we
 ought to ~~also~~ right.

Light We need a continuing
 overall look.

Holl: "For Rec & Action in NE
 2 and as of 25 XI 55"
 Annex report for Hollister.

I'm not saying WG III should
 do this job; but if in
 the Def rep. there was a
 continuing study of ec.
 activities of SSB it would be
 very valuable.

Gas: ~~May~~ Further checking in
 past week. Goodland was
 drafting a paper on this
 general subject. 1st draft

^{new} suggested ^{group} ^{being} ⁱⁿ ^{the} ^{hand} in US action; on gog desks
I found they ^{very} reluctant re more
committees. They are represented
in ICB. We now are taking
current ad line action.

gog desks would like
if US govt had a continuing
collation was maintained
of all info on matter,
including various Sov. Gov
~~put~~ spots of all forms,
plus story of what US
doing in defense, in pol,
econ, USA etc areas.

Gog desks would like
also have this draft paper
from Prokhov & Horns.
a study of Sov. Gov
trends to date, appearing
adversary W reactions to date
1972. This might be
put into Planning Hogg
to coord. + get agency contacts

i. I'm not sure will
helpful distinct the possible
functions of the committee:
not one to try to coordinate
ops, but to review what

I tried to be factual in this paper. We in Wb-III are not operators full time. To review W action overall would need larger group with new blood.

But ~~for~~ does anyone disagree with paper that Wb III now supervisors are competent to participate in determination and for actions?

Wb III Disagree re supervisors.

Wb III should ^{reword} formulate for FDR new "IR" for NSC to replace "decreasing reliance" words of 152/3.

Y412 to Halc: Please prepare redraft. Will try to circulate before meeting.
